## Hw0304 Definite Integral

由圖中可知,當x以指數成長時,黎曼和會趨近於 0.33 左右。

Hw0306 Bonus: What is the problem?

```
hw03 > C hw0306.c > 分 main()
   2
        int main()
   3
   4
        {
   5
            double f:
   6
            for( f = 0.0; f <= 0.3; f += 0.1)
   8
            printf( "%lf\n",f );
            printf("%.20lf\n",f);
  10
  11
  12
        return 0;
  13
  14
  15
PROBLEMS
           OUTPUT
                    DEBUG CONSOLE
                                   TERMINAL
siang@zhangxianglingdeMacBook-Pro hw03 % gcc hw0306.c
siang@zhangxianglingdeMacBook-Pro hw03 % ./a.out
0.000000
0.100000
0.200000
0.300000000000000004441
siang@zhangxianglingdeMacBook-Pro hw03 %
```

經過程式執行,我們會發現程式第四次執行時,為 0.300000000000000004441,但是迴圈設定的條件是小於 0.3,因為大於 0.3 導致無法執行第四次,這是因為存在著不準確而造成的結果。
